P₂O • Push-to-open

Open furniture doors with a gentle nudge

P₂O • Push-to-open

Open furniture doors with a gentle nudge

Hettich's latest innovation in the field of door function opens up interesting new design prospects for furniture manufacturers. All three variants are totally invisible when the cabinet is closed.

P₂O Magnet

As soon as you either press or pull the door gently, P₂O Magnet springs into action to open the door automatically.

P₂O Pin

Just push gently against the door and it opens all on its own.

P₂O Universal

The variant for standard hinges. P₂O Universal works without the special hinges other variants require. Just a slight nudge and the door opens!
